

AI First. Humans When It Matters

We take AI as far as it can go. Then our experts step in.

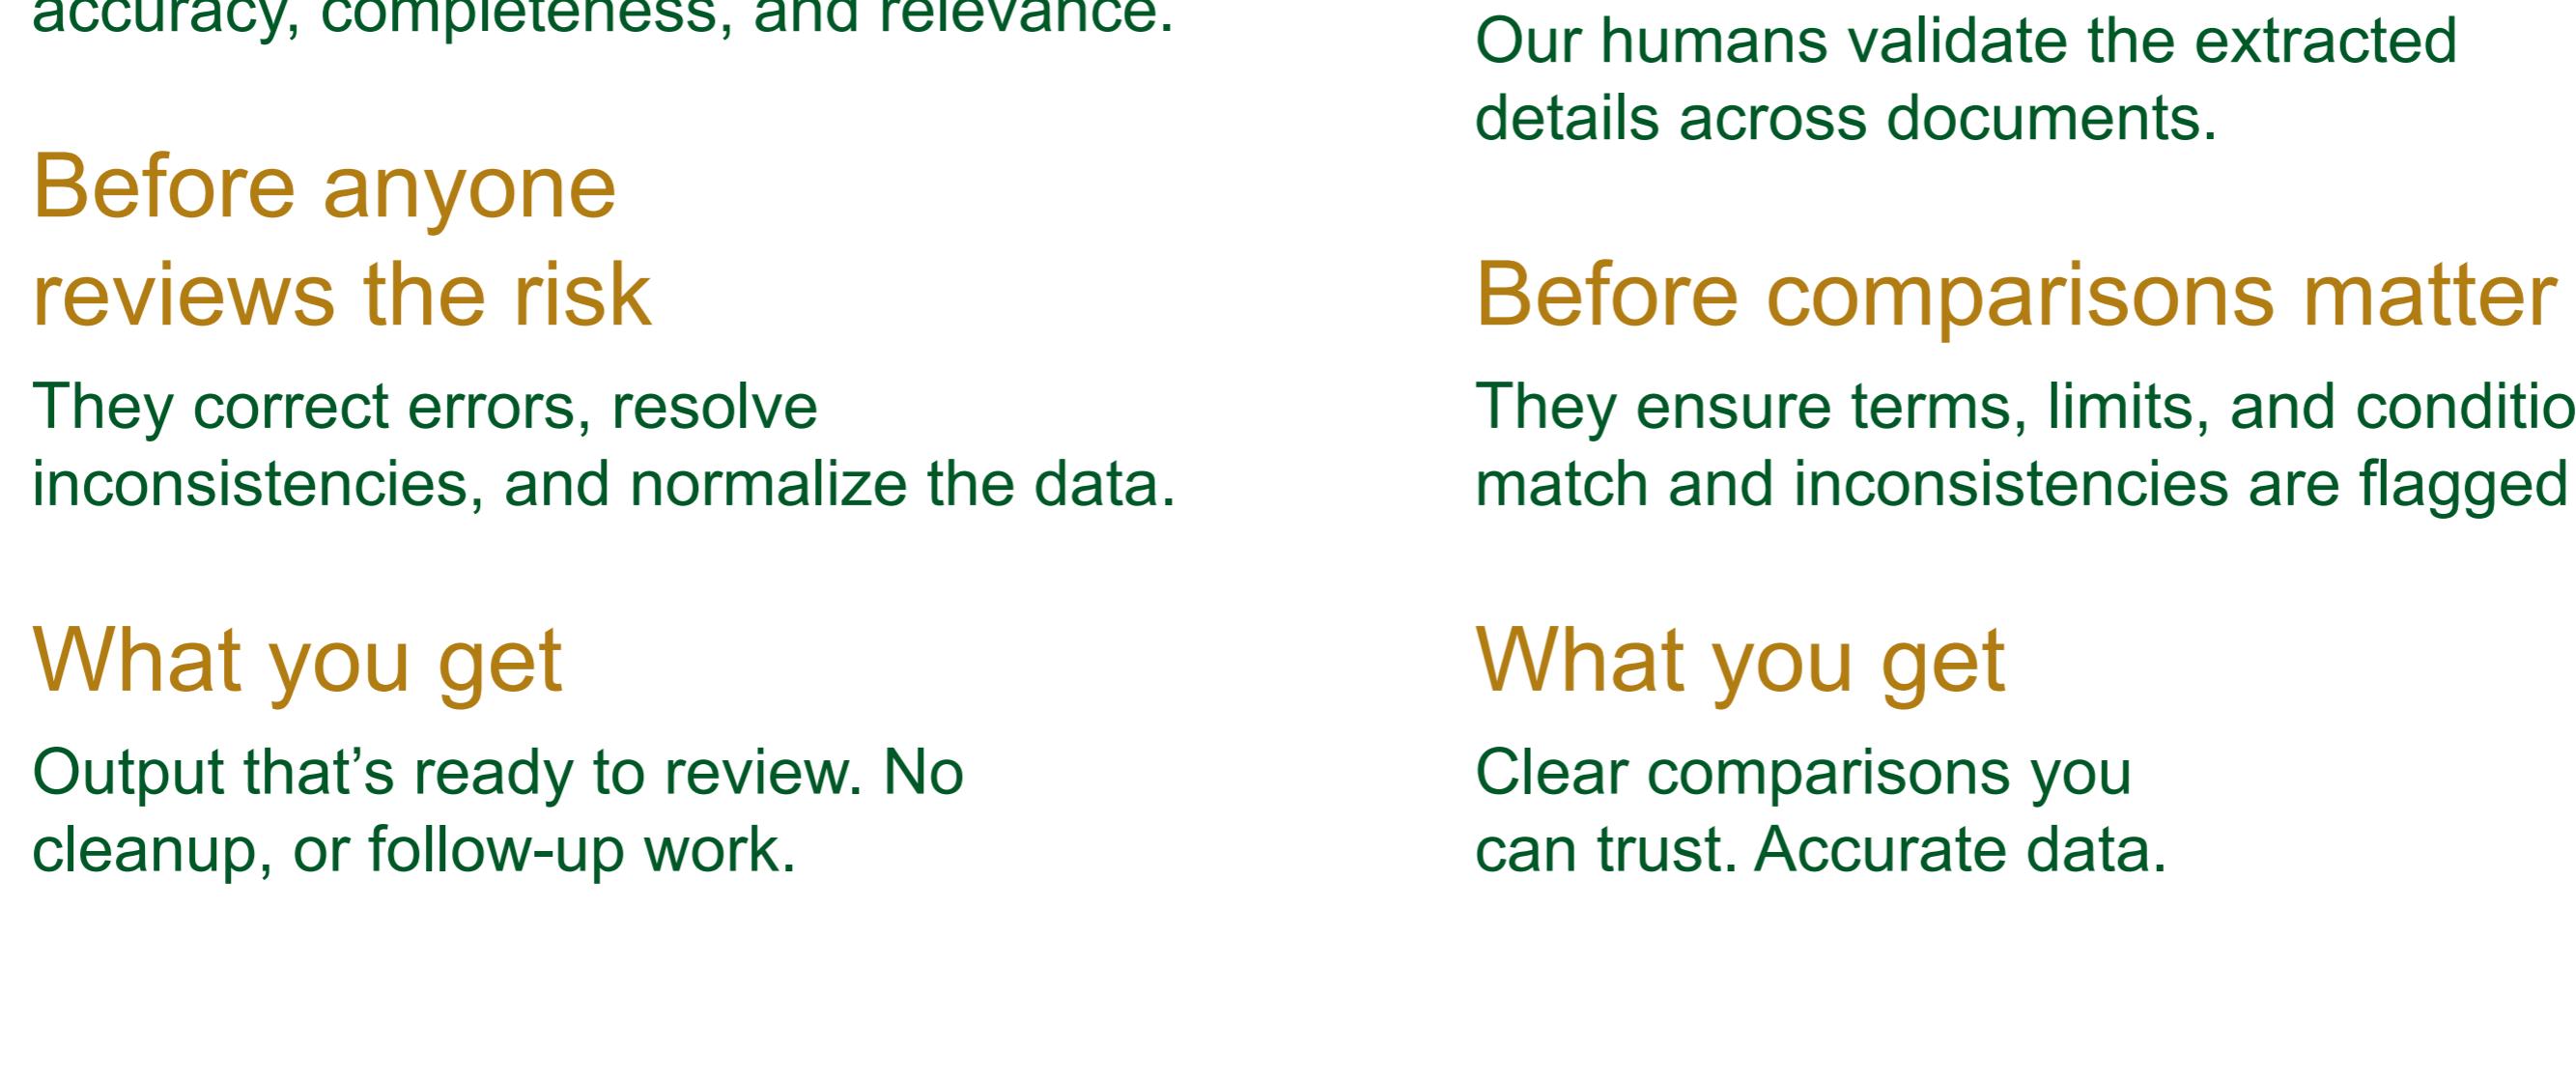

AI First + **Human Review** = **Accurate & Confident Decisions**

Who's In the Loop?

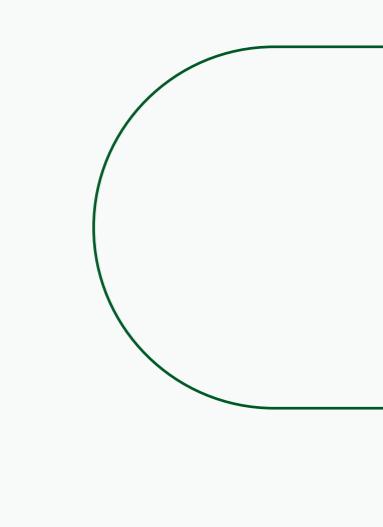

What “Human-in-the-Loop” Means to Us

Human-in-the-loop is the balance between automation and expertise.

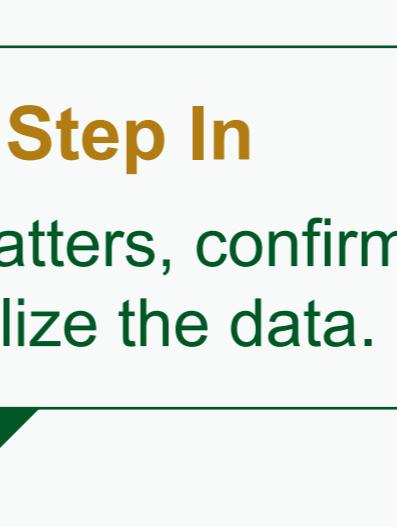

AI does what it does best: ingesting data, extracting information, and working at scale. When things get nuanced, inconsistent, or complex, our insurance experts step in to review, validate, and normalize the data.

Where HITL Shows Up

MAGIC SUBMISSION

AI-POWERED SUBMISSION INGESTION AND TRIAGE

MAGIC PLACEMENT

AI-POWERED DOCUMENT ANALYSIS AND COMPARISON

After AI extracts the data
Our humans review submissions for accuracy, completeness, and relevance.

Before anyone reviews the risk
They correct errors, resolve inconsistencies, and normalize the data.

What you get
Output that's ready to review. No cleanup, or follow-up work.

After quotes, binders or policies are ingested
Our humans validate the extracted details across documents.

Before comparisons matter
They ensure terms, limits, and conditions match and inconsistencies are flagged

What you get
Clear comparisons you can trust. Accurate data.

When Our Humans Step In

Our humans are included. Accuracy is our responsibility. Time savings are real.

Submissions Come In

Emails. S3 Buckets. Wherever submissions live, we meet them there.

AI Does the Heavy Lifting

Our AI ingests and extracts the data at speed, pulling key details across documents.

Our Humans Step In

Intellect experts review what matters, confirm accuracy, fix gaps, and normalize the data.

Data Gets Finalized

Everything is consolidated, structured, and made consistent across the submission.

Ready for Review

Clean, accurate data is delivered to your team. No rework. No extra steps. No burden on your humans.

Why Teams Actually Like This

83% increased trust in human validated output

Near 100% accuracy

Faster decisions
