

# AI First. Humans When It Matters

We take AI as far as it can go. Then our experts step in.

AI First + Human Review = Accurate & Confident Decisions

## Who's In the Loop?

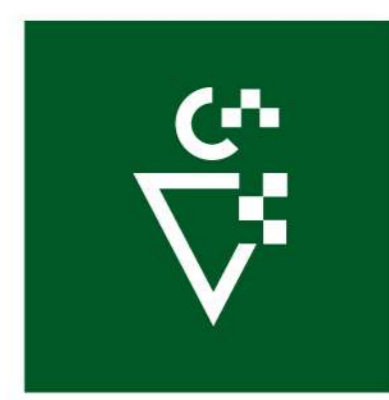

## What "Human-in-the-Loop" Means to Us

Human-in-the-loop is the balance between automation and expertise.

AI does what it does best: ingesting data, extracting information, and working at scale. When things get nuanced, inconsistent, or complex, our insurance experts step in to review, validate, and normalize the data.

## Where HITL Shows Up

**MAGIC SUBMISSION**  
AI-POWERED SUBMISSION INGESTION AND TRIAGE

**After AI extracts the data**  
Our humans review submissions for accuracy, completeness, and relevance.

**Before anyone reviews the risk**  
They correct errors, resolve inconsistencies, and normalize the data.

**What you get**  
Output that's ready to review. No cleanup, or follow-up work.

**MAGIC PLACEMENT**  
AI-POWERED DOCUMENT ANALYSIS AND COMPARISON

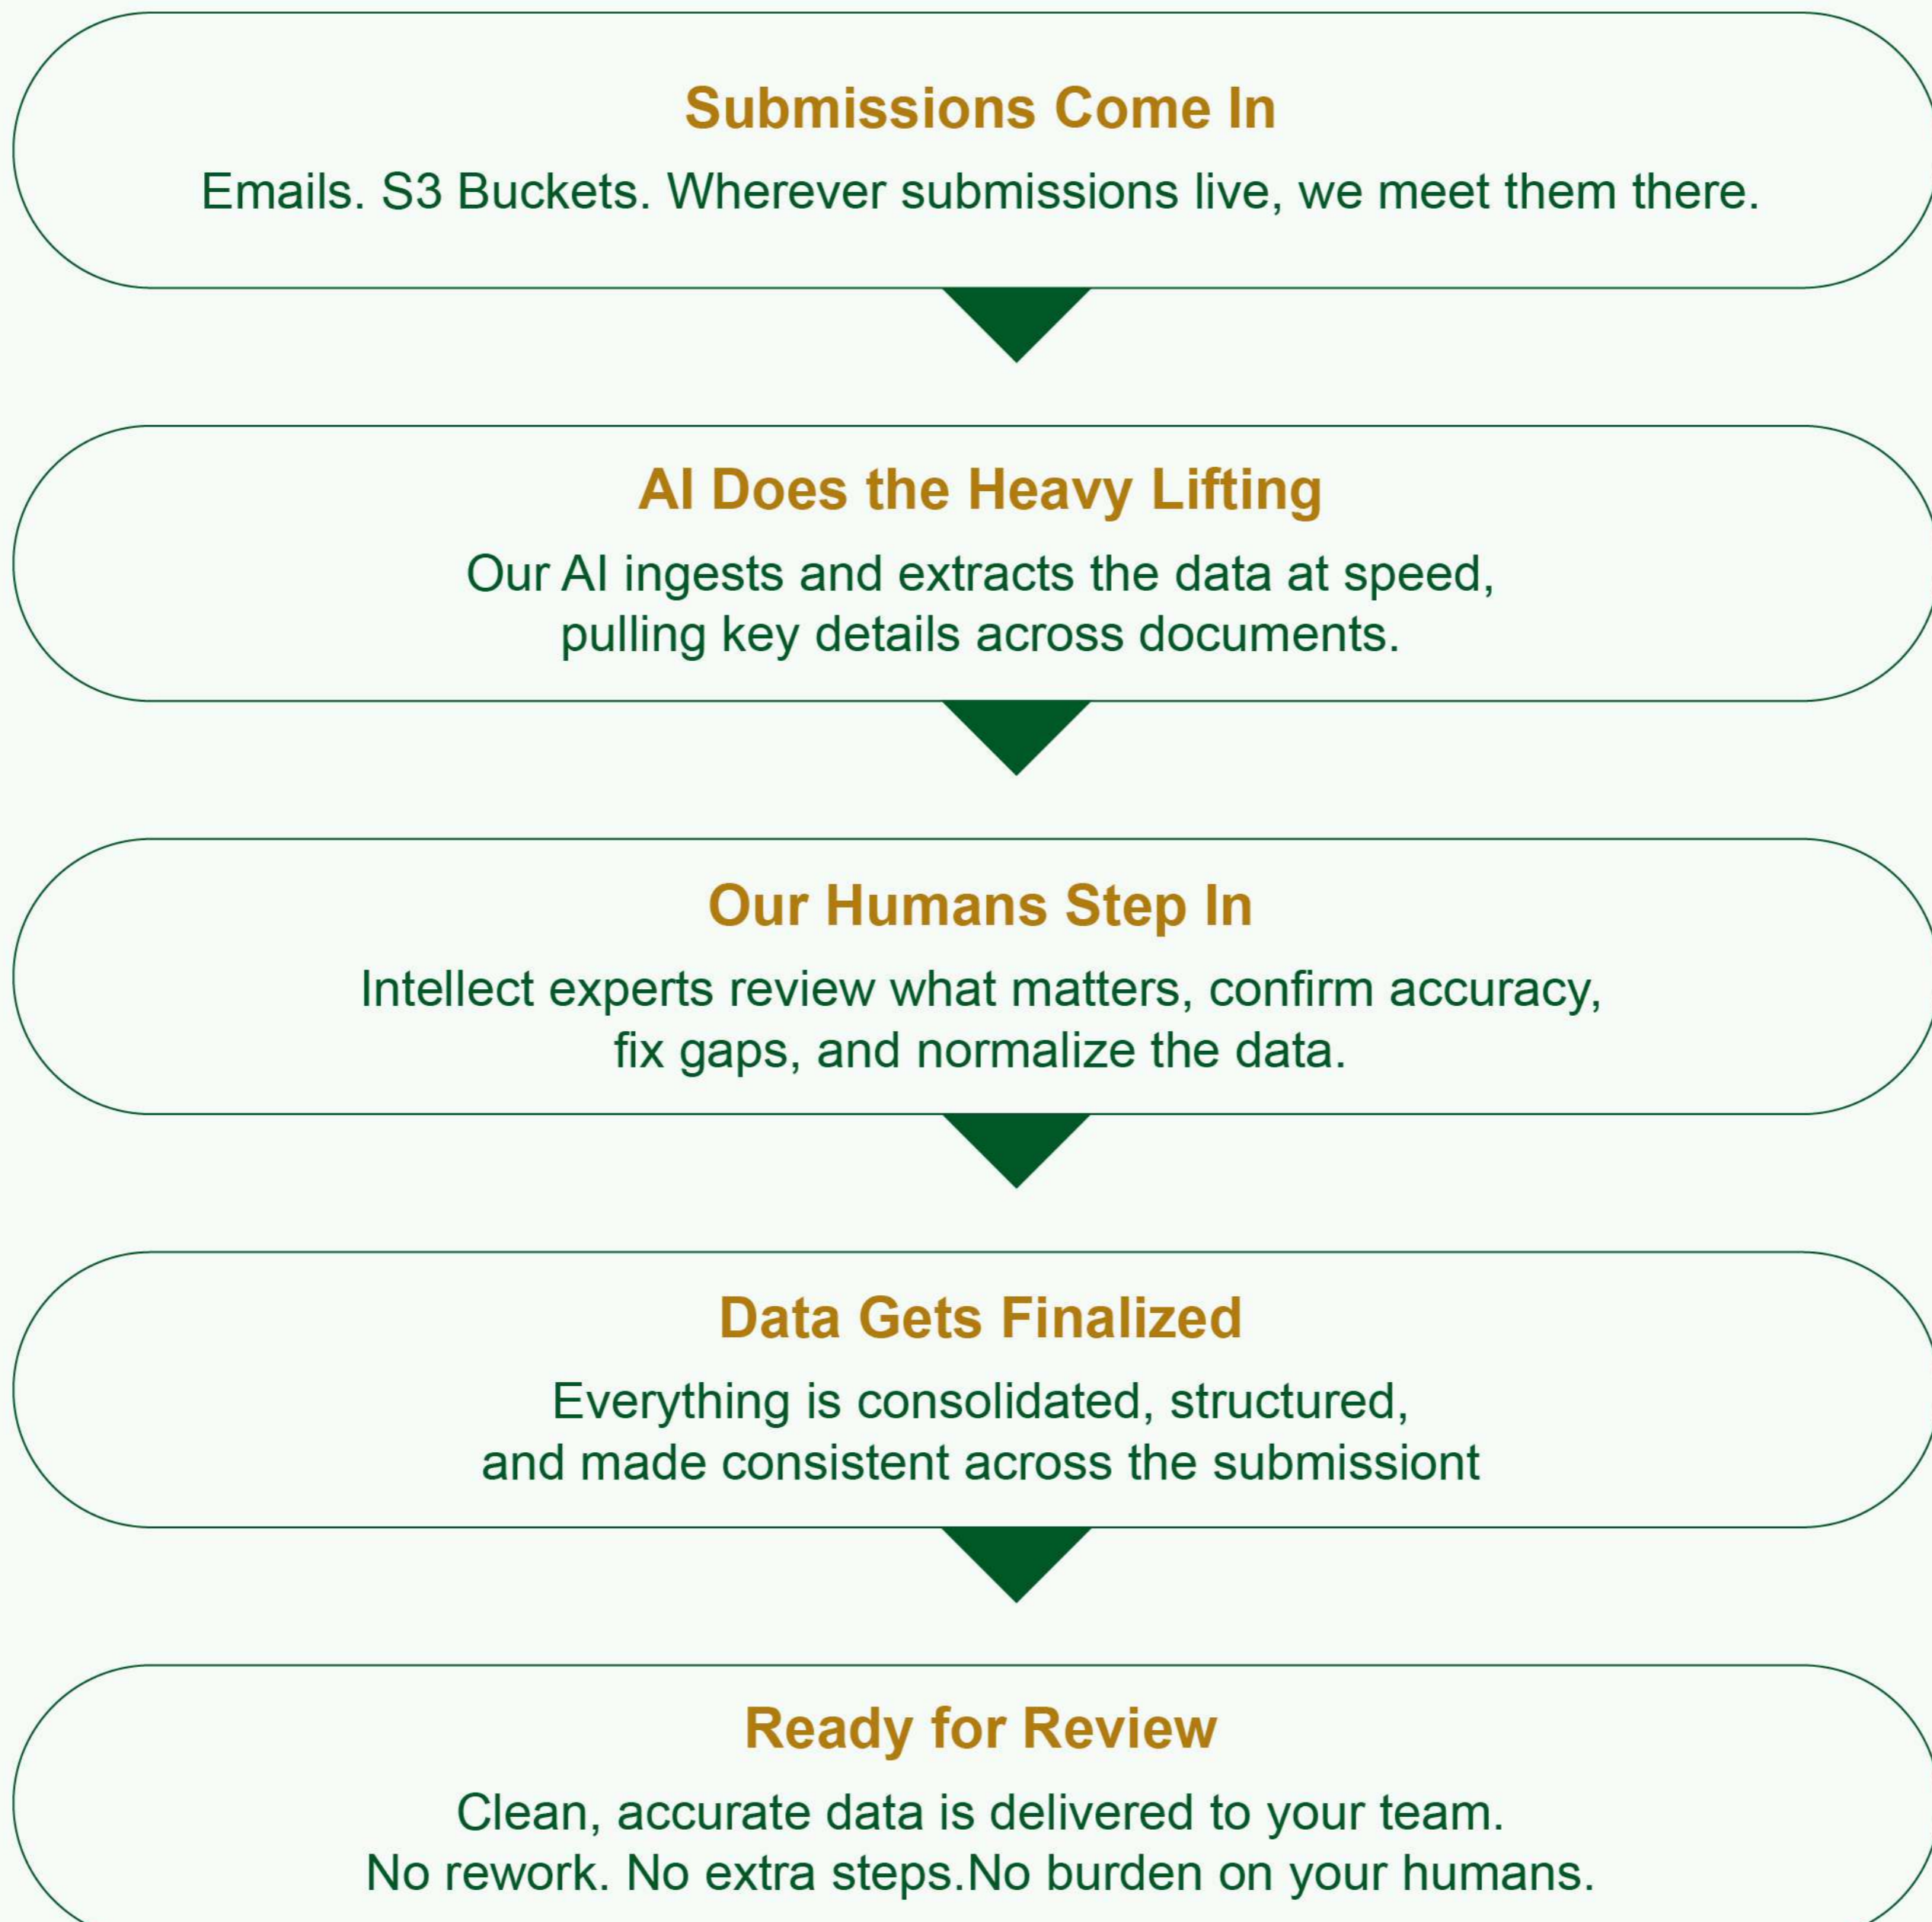

**After quotes, binders or policies are ingested**  
Our humans validate the extracted details across documents.

**Before comparisons matter**  
They ensure terms, limits, and conditions match and inconsistencies are flagged

**What you get**  
Clear comparisons you can trust. Accurate data.

## When Our Humans Step In

Our humans are included. Accuracy is our responsibility. Time savings are real.

## Why Teams Actually Like This

**83% increased trust in human validated output**

**Near 100% accuracy**

**Faster decisions**

## How to Learn More

See how our AI and humans work together across underwriting and distribution.
