

Clear Towers. Zero Gaps.

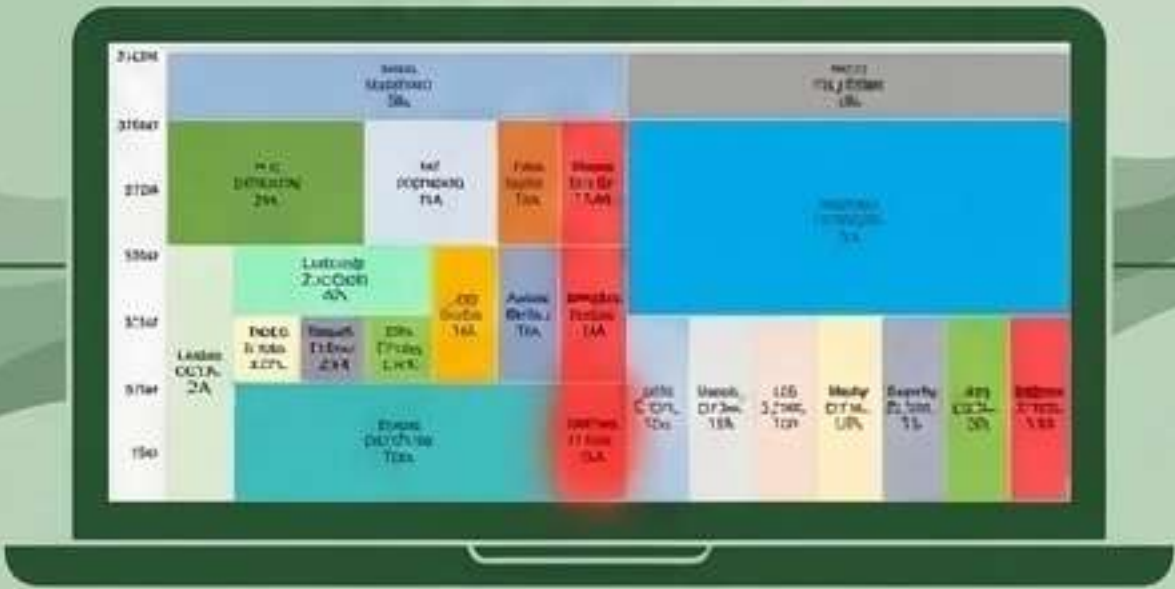

Visualize Complex Property & Liability Placements with Xponent’s Mud Map Capability

Stop squinting at fragmented spreadsheets. Our interactive mud map tool gives brokers a visual, real-time blueprint of complex **property** and **liability** towers, instantly exposing coverage shortfalls and optimizing placement.

THE STEP-BY-STEP FLOW

Step 1: Build & Layer	Step 2: Allocate & Visualize	Step 3: Audit & Identify Gaps
Drag, Drop, and Construct. Build complex, multi-layered towers in minutes. Seamlessly input attachment points, limits, and capacity. 	See Who Covers What Automatically map out exact percentage splits and dollar amounts across primary, buffer/umbrella, and excess layers. 	Reveal Hidden Exposures The mud map automatically highlights unprotected slivers and unallocated layers in bright, high-contrast red. Never miss a gap before proposing. 

VISUAL SPOTLIGHT

KEY BENEFITS

Precision Placements – Calculate precise quotas and shared layers down to a fraction of a percent without manual spreadsheet math.

Client-Ready Transparency – Turn a messy, confusing risk profile into an intuitive visual map you can present directly to clients to justify renewal strategies.

Faster Turnarounds – Identify exactly which layers need to be filled so you can market specific, targeted chunks to carriers immediately.
